VED RATES.

Annual VED (second year onwards), for cars costing over £40,000, is payable for five years. VED rates for brand new cars are determined by their CO₂ emissions figure. First year VED applies to the first year of ownership. Annual VED rates apply thereafter. The All-Electric MINI Countryman models fall into the category below:

CO ₂ emissions – combined (g/km)	0	Annual VED – second year onwards (standard rate for electric vehicles)	£0
First year VED (electric vehicles)	£0	Annual VED – second year onwards (electric vehicles over £40,000)	£0

CHARGING.

The All-Electric MINI Countryman includes a Mode 3 Charging Cable for public charging and the MINI Charging Card as standard, granting you access to the continuously expanding public charging network. If you wish to charge your MINI at home, the optional Mode 2 Flexible Fast Charging Cable with 3-pin plug can be purchased, or you have the option to install a Wallbox with our partner [Pod Point](#). A guide to charging times and rates are below, these are dependent on the local electricity infrastructure.

TYPE	RATE	E (hrs:mins)	SE ALL4 (hrs:mins)
HOME CHARGING (AC 0-100%)			
Charging with Mode 2 cable (Flexible Fast Charger with 3-pin plug)	2.3kW	34:30	34:30
Charging with Wallbox	7.4kW	10:00	10:00
PUBLIC CHARGING (AC 0-100%/DC 10-80%)			
AC charging with Mode 3 cable	11kW	06:30	06:30
DC charging at max charge rate	130kW	00:29	00:29

CO ₂ Emissions Combined*	147-139 g/km	169-155 g/km	180-177 g/km

Electric power consumption/fuel consumption, electric range values and CO₂ will vary dependent on vehicle specification. Build your MINI, view the CO₂ electric power consumption/fuel consumption and equivalent all-electric range figures for your chosen model and decide the specification using the [online configurator](#).

Prices and Specifications.

MINI UK reserves the right to alter prices and specifications without notice. MINI UK has made every effort to ensure the accuracy of information but does not accept liability for any errors or omissions.

† = preliminary data

* = These figures were obtained after the battery had been fully charged. The All-Electric MINI Countryman is a battery electric vehicle requiring mains electricity for charging. These figures were achieved using the WLTP test procedure. Figures shown are for comparability purposes. Only compare CO₂, fuel consumption, electric power consumption and electric range figures with other cars tested to the same technical procedures. These figures may not reflect real life driving results, which will depend upon a number of factors including the starting charge of the battery, accessories fitted (post-registration), variations in weather, driving styles and vehicle load.
